

Cornelia Connelly School  
Summer Assignment  
Honors Algebra II/Trig

Book: Forgotten Algebra

Author: Barbara Lee Bleau

Publisher: Barron's Educational

ISBN: 9781438001500

As a prerequisite for entering Honors Algebra II/Trig in the fall, you are required to complete a set of summer work that will review and introduce topics used in this course. The book provides a nice review and will serve as a reference for future coursework. To receive credit for the summer work and therefore be allowed to take Honors Algebra II/Trig you are to read the following chapters and complete the corresponding problems.

**Complete the odd numbered exercises at the end of the following units:**

**Units 1-12, 15, 16, and 23**

Complete your work on notebook paper. Clearly label each unit, write out each exercise to be solved, show all your work, and check your answers against the solutions in the back of the book. Full credit will only be given to student papers that are complete.

The problems assigned over the summer are due to your instructor on the first day of school. There will be a test covering the material at the end of the first week of school. It would be to your benefit to begin early and not wait until the week before school to begin the summer work. This would defeat the purpose of the summer preparation and hurt your chances of success in the Honors Algebra II/Trig course. Good luck and have a productive summer.
